

LS 60 Softbox

Main Features

- Compact Square Softbox Designed for the LS 60d & LS 60x
- 2 Types of Front Diffusion (1.5 Stop & 2.5 Stop)
- 45° Light Control Grid
- Diffusion Area Larger than a 1x1 Panel
- Includes Carrying Bag

Product Description

The LS 60 Softbox is a square softbox that matches the compact design of the 60d and 60x by softening the output without adding excess bulk. Its minimal 4-rod design maintains a simple construction while still giving users all the tools they need to modify their light, including two diffusion fabrics (1.5 stop & 2.5 stop) and a light control grid.

With 35-centimeter, or roughly 14-inch, long sides, the diffusion is ideal for a small softbox. Its diffusion area is larger than the aperture of 1x1 LED panel, making the LS 60 Softbox great for quick, run-and-gun key, fill, or hair lights, particularly for ENG shooters and guerilla filmmakers.

With a softbox that packs down into a slim carrying bag, filmmakers can now transform their LS 60d or 60x from a punchy, focusable point-source to a soft light in seconds.
